

Biz Training Solutions

Asbestos Awareness Cat A

IATP Accredited

Summary

Asbestos is a hazardous substance; every year over 5,000 people die from asbestos related diseases, such as lung cancer. Anyone likely to disturb or damage asbestos containing materials must be aware of the dangers and know what procedures to follow.

Our course will help you to understand where asbestos can be found, the risks associated with it and how to reduce the risk of asbestos fibres being released. If you plan to carry out work which will knowingly disturb or damage asbestos, you will require a higher level of training (category B or C).

Lessons:

- Lesson 1 - Asbestos - The basics
- Lesson 2 - Legislation and responsibilities
- Lesson 3 - How to complete a risk assessment
- Lesson 4 - Asbestos and risk reduction

Continuing professional development (CPD):

All of our courses are certified by the CPD certification service

We offer formal accreditation:

Open College Network West Midlands is a national award winning organisation, regulated by Ofqual and the Quality Assurance Agency for Higher Education (QAA). Additional costs will apply.
